

## DRUG SAFETY SPECIALIST Oakville, Ontario

**Celgene Canada** is committed to delivering innovative therapies designed to improve the lives of patients worldwide. We are a global biopharmaceutical company with operations in more than 70 countries helping to turn incurable cancers into chronic, manageable conditions. Our success has depended on innovative products and dedicated professionals who understand we are in the business of improving and extending lives.

The Drug Safety Specialist will manage safety data reported to Celgene Canada in accordance with corporate and regulatory requirements

### **DESCRIPTION**

1. Management of Adverse Event (AE) case data through the receipt and triage of local AE reports received from Health Care Professionals or consumers. Reporting of such to Global Safety via the global safety database.
2. Initiation and conduct of follow-up activities related to local AE reports including direct telephone follow-up as required.
3. Assessment of local and global clinical trial and post marketed serious AE reports for submission to Health Canada in accordance with federal requirements. Provision of support to the Submissions Associate for all submission activities.
4. Support senior team members in training activities related to Drug Safety & AE reporting both internally and externally.
5. Assist senior team members in the management and maintenance of good customer relationships both internally with the Celgene Affiliate office and externally with key customers.
6. Assist in responding to safety inquiries received from Health Care Professionals or Health Canada.
7. Maintenance of high compliance standards with respect to reporting timeliness and quality of local AE data. Ensuring all standard operating documents are followed and that the department is inspection/audit ready at all times.
8. Champion Celgene Values.

### **EXPERIENCE & REQUIREMENTS**

- ◆ BS degree, RN or Pharmacist qualification
- ◆ Two years clinical experience
- ◆ Good clinical knowledge of therapeutic area, patient populations and drug class
- ◆ Excellent computer skills with full proficiency of MS-Office Applications
- ◆ French language skills preferable

- ◆ Knowledge of Health Canada requirements with respect to ADR Reporting and Pharmacovigilance activities.
- ◆ Self-starter with superior time management skills, and ability to work independently or in teams
- ◆ Strong attention to detail.

As a growing company, our employees thrive in a fast paced, exciting environment, and take pride in knowing their contributions help build and impact the company's future. In addition to an outstanding compensation and benefits package, we offer an exciting work environment where our employees help build and impact the company's future.
